## Description

### Agile Certified Practitioner (ACP) workshop Program Faculty

All the members of our faculty are Agile Practitioner like Agile manager, Agile Product Owners, Agile Product Manager and Agile coach who have in-depth industry experience in the conception, migration and implementation of Agile in IT industry.

### Why PMI-ACP by PMI?

Project Management practitioner can use Agile values, principles and practices to manage changes, improve communication, reduce/optimize cost, increase efficiency, increase self-satisfaction and enhance value to customer and stakeholders.

## What value does PMI-ACP brings to practitioner?

The PMI-ACP validates a practitioner's ability to understand and apply agile principles and practices on basic projects. The PMI-ACP demonstrates that a practitioner can select agile principles and practices as a project management approach based on the needs and demands of a specific project.

### By earning the PMI- ACP, practitioners can:

- Demonstrate to employers their level of professionalism in agile practices of project management.
- Increase their professional versatility in project management tools and techniques. Show they have the capacity to lead basic teams using agile principles and practices by holding a certification that is more credible than existing offerings based only on exams or training.
- Surveys have shown that a practitioners holding PMI- ACP credential earn 10% to 20% more

## What value does PMI-ACP brings to organization?

The PMI- ACP demonstrates a practitioner's value to employers and level of professionalism:

- The knowledge of both agile and waterfall practices gives the practitioner greater breadth and depth as a project manager.  
The certification shows the practitioner's ability to lead basic teams using agile principles and practices.
- The certification appeals to a wide, rapidly growing audience as more organizations adopt agile principles and practices.
- Increase Productivity and Quality by adopting agile principles and practices.

---

## Agenda Topic

### MODULE 1

- Agenda for 3 days workshop
- What is PMI-ACP?
- Where you stand?
- Questions and Answers session

### MODULE 2

- Agile Manifesto
- Agile Framework
- Agile Lifecycle
- Agile Methodology

### MODULE 3

Scrum

### MODULE 4

- Agile Communication
- Communication concepts and management o Daily stand up meetings
- Osmotic communication
- Information radiator
- Team space
- Communication tools
- Knowledge sharing

### MODULE 5

#### Agile Estimation

- Relative sizing
- Ideal days Vs. Story Point o Planning poker
- Affinity estimation

### MODULE 6

- Planning, Monitoring and Adopting o Retrospective
- Task/Kanban boards
- Time boxing
- Iteration Release Planning o WIP limits
- Burn down/up charts
- Cumulative flow diagrams
- Process tailoring
- Project Scaling

## **MODULE 7**

### Agile Analysis and Design

- Product roadmap
- User stories
- Backlog
- Story maps
- Progressive elaboration
- Wireframes
- Chartering
- Personas
- Agile Modeling

## **MODULE 8**

- Product Quality  
Verification and validation
- Test driven development
- Definition of Done  
Continuous Integration  
Refactoring

## **MODULE 9**

- Soft Skills Negotiation
- Emotional Intelligence
- Collaboration
- Adaptive and Servant leadership
- Negotiation
- Conflict resolution
- Servant Leadership
- Shu-Ha-Ri
- Coaching and mentoring technique

## **MODULE 10**

### **Value-based prioritization**

- ROI: Return on Investment
- NPV: Net present value
- IRR: Internal rate of return
- Customer-valued prioritization
- MMF: Minimum marketable feature
- Relative ranking/prioritization

### **Risk Management**

- Risk adjusted backlog
- Risk burn down graphs
- Risk-based spikes

## **MODULE 11**

### **Metrics**

- Velocity cycle time
- EVM: Earn value management
- Escaped defects
- Impediments removed
- Enhance productivity

### **Value stream Analysis**

- Value stream mapping
- Lean Software Development
- Lean Portfolio management
- Lean Release planning

## **MODULE 12**

- Vendor Management
- Quality Standards
- Team Motivation
- Self-assessment
- Contracting
- Variance and trend analysis
- Compliance
- System thinking

### **Module 13:**

Simulation test practice
